Flexible Metering System

THE RIGHT TO CHOOSE.

THE RIGHT TO CHOOSE.

Revolutionary OPEN state-of-the-art control & management system

The innovative and flexible CITYCOM platform enables the easy connection of a variety of communication standards and practically any meter type to the CITYCOM control and management system.

ANY COMMUNICATION •
ANY METER •
ANY APPLICATION •

User-friendly interface

AMI/AMR

Exceptionally reliable AMI / AMR system

Comprehensive consumption data

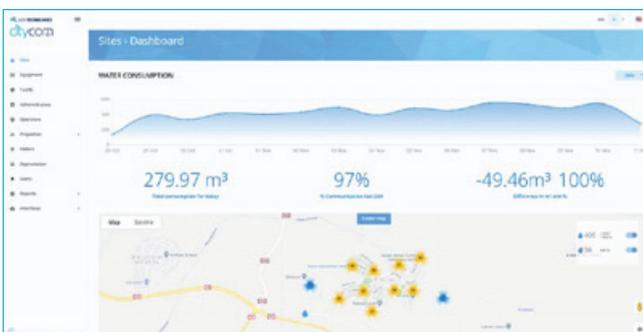

Leakage and theft alerts

NRW

Advanced non-revenue water (NRW) control

Full duplex communication

Water Consumption

Site Consumption

CONNECT Revolutionary Communication System

CONNECT provides exceptionally long-range remote water meter reading solutions, with fast and simple infrastructure deployment, significantly faster than the solutions currently available in the market.

CONNECT offers stable UHF AMI/AMR communication over time, lowering the costs of installation and maintenance, along with minimal communication equipment positioning throughout the city advantage in terms of both visibility and resident objections.

FCC & Israeli Ministry of Communications certified, ISO 4064-2014 tested.

Exceptionally long coverage range of up to 5 kilometers

Cyber secured transmission

Integrated communication solution

Simple infrastructure, installation, and maintenance

Up to 10-years battery life

Integrated CONNECT Water Meters

CONNECT offers integrated water meters with communication module under-the-glass.

MVCONNECT
by Madey Vered

MEISTREAM CONNECT
by SENSUS

Connecting Any 3rd Party Meter or Sensor to the CITYCOM

With the universal communication unit you can connect practically any meter or sensor including PH sensors, water quality sensors, pressure control sensors, as well as utilities such as gas, electricity, and more.

GCT develops telecommunication systems, Command & Control software, transmitting water meters and various interfaces and complementary technologies, in order to create the most advanced AMR/AMI system on the market.

The Company has set itself the mission of creating a limitless range of possibilities for the water utilities in their selection of the equipment to be purchased and the use of existing equipment. The open interface that has been developed, and its interface with transmitting water meters belonging to other systems, enables selection of the most suitable equipment while achieving significant savings.

GCT development team is comprised of developers of hardware and software systems. The close cooperation between the managers of the development teams with the Madey Vered installation crews ensures continual development and most importantly it guarantees speedy responses to the market needs and the customer needs.

Gaon Group is a leading Israeli solutions provider for water and gas distribution, sewage treatment, desalination and fire protection markets.

Industry Expertise

Gaon Group end-to-end portfolio of products, solutions and services are competitive and reliable and consists of strong Israeli brands.

Technology Leadership

Through strategic collaborations with leading companies and organizations in Israel and abroad, we strive to maintain technological superiority while delivering added, long lasting value for our customers. All of the products are designed to meet the highest international standards to ensure consistent quality across the entire value chain.

Gaon Group delivers its services and solutions through four customer oriented divisions, each providing specialized solutions in accordance with the challenges and demands of the customer:
